SECTION 4: FIRST AID MEASURES
SAFETY DATA SHEET

FILE NO.: Incoming_SDS_R-11_00
SDS DATE: January 2014

SKIN: Flush exposed skin with lukewarm water (not hot). Get medical attention if irritation persists.

EYES: Immediately flush with large amounts of water for at least 15 minutes. Get medical attention if irritation persists.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention. Do not give adrenaline, epinephrin or similar drugs following exposure to this product.

INGESTION: DO NOT induce vomiting unless instructed to do so by a physician. DO NOT give stimulants. Get medical attention immediately.

ADVICE TO PHYSICIAN: Because of the possible disturbances of cardiac rhythm, catecholamine drugs, such as epinephrine, should be used with special caution and only in situations of emergency life support. Treatment of overexposure should be directed at the control of symptoms and the clinical conditions.

SECTION 5: FIRE-FIGHTING MEASURES

EXTINGUISHING MEDIA: Use extinguishing media appropriate to surrounding fire conditions.

UNUSUAL FIRE AND EXPLOSION HAZARDS: May decompose on contact with flames or extremely hot metal surfaces to produce toxic and corrosive products. Container may explode if heated due to resulting pressure rise.

SPECIAL FIRE-FIGHTING PRECAUTIONS/INSTRUCTIONS: Firefighters should wear self-contained, NIOSH-approved breathing apparatus for protection against possible toxic decomposition products. Proper eye and skin protection should be provided. Use water spray to keep fire-exposed containers cool.

SECTION 6: ACCIDENTAL RELEASE MEASURES

ACCIDENTAL RELEASE MEASURES: If the release is caused by an open valve and it is safe for operator to close, do so. If possible to transfer the remaining material in the container in a safe manner to a separate tank, do so. Absorb liquid with commercial absorbent and shovel into a drum/waste container. Evacuate area in the event of a significant release in an enclosed area. Keep upwind. Ventilate area, especially low places. Remove open flames and heating elements. Disperse gas with floor level forced air. Gas will evaporate.

Spills and releases may have to be reported to Federal and/or local authorities. See Section 15 regarding reporting requirements.

SECTION 7: HANDLING AND STORAGE

HANDLING AND STORAGE: Avoid breathing fumes. Avoid contact with eyes, skin and clothing. Keep container closed. Use only with adequate ventilation. Use properly rated containers only. in a cool, well-ventilated area of low fire risk and out of direct sunlight. Storage in subsurface locations should be avoided. Close container tightly after use and when empty.

OTHER PRECAUTIONS: R-11 boils at 74.5°F, so contents may be under pressure, depending on ambient temperatures. Exercise caution when opening container. If containers have been stored in direct sunlight or heated above the boiling point of the solvent, the container should be cooled to below the boiling point before opening. Avoid areas where salt or other corrosive materials are present. Avoid excessive inventory and storage time.

ENGINEERING CONTROLS: Provide local ventilation at filling zones and areas where leakage is probable. Mechanical (general) ventilation may be adequate for other operating and storage areas.

PERSONAL PROTECTIVE EQUIPMENT:
SKIN: Wear appropriate chemical resistant protective clothing and chemical resistant gloves to prevent skin contact. Consult glove manufacturer to determine appropriate type of glove material for given application. Wash contaminated clothing and clean protective equipment before reuse. Wash skin thoroughly after handling.

EYES: Where there is reasonable probability of liquid contact, wear chemical safety goggles, and have eye flushing equipment available.

RESPIRATORY: None generally required for adequately ventilated work situations. For accidental release or non-ventilated situations, use a self-contained, NIOSH-approved breathing apparatus or supplied air respirator. For escape, use the former or a NIOSH-approved gas mask with organic vapor canister.

ADDITIONAL RECOMMENDATIONS: Wash hands after use and before eating or drinking. Provide eyewash stations and quick-drench shower facilities at convenient locations.

SECTION 11: TOXICOLOGICAL INFORMATION

ROUTES OF EXPOSURE: Inhalation, Skin contact, Eye contact, Ingestion

ACUTE EFFECTS OF EXPOSURE: Discomfort due to volatility would be expected. High vapor concentrations are irritating to the eyes and respiratory tract and may result in central nervous system effects such as headache, dizziness, drowsiness and, in severe exposure, loss of consciousness and death. The dense vapor of this material may reduce the available oxygen for breathing, and prolonged exposure to an oxygen-deficient atmosphere may be fatal.
Inhalation may cause an increase in the sensitivity of the heart to adrenaline, which could result in irregular or rapid heartbeats. Medical conditions aggravated by exposure include heart disease or compromised heart function.

**CHRONIC EFFECTS OF EXPOSURE:** None known

**ACUTE TOXICITY:**
- $\text{LC}_{50} (\text{rat} – 4 \text{ hr.}) = 26,000 \text{ ppm}$
- Cardiac Sensitization Threshold (dog) = 5,000 ppm
- Anesthetic Concentration = 35,000 ppm (10 min.)

**CHRONIC TOXICITY:** Subchronic NOEL – 10,000 ppm

**DESCRIPTION OF SYMPTOMS:** Inhalation of high concentration may lead to unconsciousness and possible death. Effects of overexposure by inhalation or ingestion may include non specific discomfort, such as nausea, headache, or weakness, or temporary central nervous system depression with effects such as dizziness, headache, confusion, loss of coordination, and loss of consciousness. Higher exposures by inhalation or ingestion may cause temporary alteration of the heart's electrical activity with irregular pulse, palpitations, or inadequate circulation. Individuals with pre-existing diseases of the central nervous or cardiovascular system may have increased susceptibility to the toxicity of excessive exposure.

**CARCINOGENICITY:** Not listed as a carcinogen by NTP, IARC, or OSHA

**SECTION 12: ECOLOGICAL INFORMATION**

**AQUATIC TOXICITY:**
- $\text{LC}_{50} (\text{rainbow trout} – 96 \text{ hr.}) = 190 \text{ mg/L}$

**DEGRADABILITY:** No data available

**BIOACCUMULATION:** No data available

**ADSORPTION/LEACHING:** No data available

**OTHER ADVERSE EFFECTS:**
- Ozone Depletion Potential (CFC 11 = 1.0): 1.0
- Global Warming Potential (CO$_2$ = 1.0): 4750

**SECTION 13: DISPOSAL CONSIDERATIONS**

**RCRA:** Unused product is considered to be a RCRA hazardous waste if discarded.

**RCRA ID number is:** U121

**DISPOSAL CONSIDERATIONS:** Recover, reclaim or recycle when practical. Dispose of in accordance with federal, state and local regulations. R-11 is subject to U.S. Environmental Protection Agency Clean Air Act Regulations Section 608 in 40 CFR Part 82 regarding refrigerant recycling.

Chemical additions to, processing of, or otherwise altering this material may make this waste management information incomplete, inaccurate, or otherwise inappropriate. Furthermore, state and local waste disposal requirements may be more restrictive or otherwise different from federal laws and regulations. Contact a certified reclaimer for recovery/reclamation of this product.
